

Select the reasons to replicate data to the cloud.

Select one or more:

- ☐ a. Cloud replication keeps your data offsite and away from the company's site.
- ☐ b. Cloud replication is expensive than replicating data to your own data center
- ☐ c. Replicating data to the cloud provides on-demand scalability
- ☐ d. For smaller businesses, replicating data to the cloud can be not secure especially if you do not have security expertise on staff
- ☐ e. When replicating data to the cloud, you have many geographic choices, including having a cloud instance in the next city, across the country, or in another country as your business dictates.

Select the technical components which are enabling high availability.

Select one or more:

- ☐ a. Data backup and recovery
- ☐ b. Load balancing
- ☐ c. Clustering
- ☐ d. Storage
- ☐ e. Autoscaling

d

Select the essential elements for a highly available system.

Select one or more:

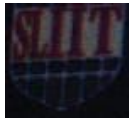

- ☐ a. Redundancy
- ☐ b. Monitoring
- ☐ c. Failover
- ☐ d. Elasticity
- ☐ e. Consistency

Select the correct statement/s about High Availability.

Select one or more:

- ☐ a. It is a quality of computing infrastructure that allows it to continue functioning, even when some of its components fail.
- ☐ b. Highly available systems do not guarantee a certain percentage of uptime
- ☐ c. The number of "nines" is commonly used to indicate the degree of high availability.
- ☐ d. This is important for mission-critical systems that cannot tolerate interruption in service, and any downtime can cause damage or result in financial loss.
- ☐ e. It is a quality of computing infrastructure that do not allow to continue functioning, even when some of its components fail.

Select the correct statement/s about Load Balancing.

- A. It is the process of efficiently distributing network traffic across a group of backend servers.
- B. Round Robin is one of the algorithms used in Load balancing
- C. Least time and Least connections are some of the algorithms used in Load balancing

Select one:

- ☐ a. A
- ☐ b. B
- ☐ c. A,B
- ☐ d. A,B,C
- ☐ e. A,C

Flag question

Select the elements of a Disaster Recovery (DR) Plan.

- A. Risk Evaluation
- B. Business Critical Asset Identification
- C. Backup Strategy

Select one:

- ☐ a. A
- ☐ b. B
- ☐ c. A,B
- ☐ d. A,B,C
- ☐ e. A,C

Select correct statement/s about Business Continuity.

- A. It is the capability of an organization to continue the delivery of products or services at pre-defined acceptable levels following a disruptive incident
- B. Business Continuity Planning (BCP) is the process of creating systems of prevention and recovery to deal with potential threats to a company
- C. Business Threat Analysis is a BCP Analysis type.

Select one:

- ☐ a. A
- ☐ b. B
- ☐ c. A,B
- ☐ d. A,B,C
- ☐ e. A,C

Please refer below Azure Network Security Group assigned to the subnet 10.0.2.0/25 and select **incorrect** statements from below.

Inbound

Priority	Name	Port	Protocol	Source	Destination	Action
100	AllowHttps	443	TCP	Any	Any	Allow
110	AllowRDP	3389	TCP	VirtualNetwork	Any	Allow
120	DenyAll	Any	Any	Any	Any	Deny

Outbound

Priority	Name	Port	Protocol	Source	Destination	Action
100	AllowHttp	80	TCP	Any	Any	Allow
110	AllowHttps	443	TCP	Any	Any	Allow
120	DenyAll	Any	Any	Any	Any	Deny

Select one or more:

- ☐ a. An outside user can connect to a Windows VM with the IP address 10.0.2.5 using RDP
- ☐ b. An outside user can connect to a Linux VM with the IP address 10.0.2.8 using SSH
- ☐ c. An outside user can connect to a VM with the IP address 10.0.2.7 through port 443
- ☐ d. A VM with the IP 10.0.2.125 can connect to another VM with the IP 10.0.2.10 using RDP
- ☐ e. A VM with the IP 10.0.2.135 can connect to another VM with the IP 10.0.2.10 using RDP

Which of the following statements are true regarding an IP address range 172.16.10.128/17 with respect to cloud virtual networks?

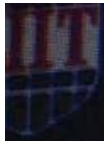

Select one or more:

- ☐ a. This range can be divided into 1 x /18 subnet, 2 x /19 subnets
- ☐ b. This range can be divided into 1 x /19 subnet, 2 x /20 subnets and 8 x /21 subnets
- ☐ c. This range can be divided into 1 x /21 subnet, 8 x /24 subnets
- ☐ d. This range can be divided into 1 x /19 subnets and 1 x /20 subnets and 2 x /21 subnets
- ☐ e. This range can be divided into 1 x /20 subnet, 6 x /21 subnets

Which of the following statements are true regarding an IP address 192.168.0.64/28 with respect to cloud virtual networks?

Select one or more:

- ☐ a. The last usable IP address is 192.168.0.78
- ☐ b. Subnet mask of the address is 255.255.255.0
- ☐ c. Number of usable addresses are 11
- ☐ d. The first usable IP address is 192.168.0.65
- ☐ e. IP address 192.168.255.254 is reserved as the default gateway IP address

Select the incorrect statement/s regarding Network Peering.

Select one or more:

- ☐ a. Allows to connect and communicate between two virtual networks
- ☐ b. Support transitive peering.
- ☐ c. Each virtual network can be peered to more than one virtual networks.
- ☐ d. Used to be implemented through VPN Gateways.
- ☐ e. Only Azure has implemented Network Peering

question

What are the 3 layers that make up SDN ?

Select one:

- ☐ a. The network layer, The physical layer and The transport layer
- ☐ b. The application layer, The control layer, and The physical layer
- ☐ c. The application layer, The transport layer, and The network layer
- ☐ d. The transport layer, The network layer, and The datalink layer
- ☐ e. The physical layer, The control layer, The network layer

Select the correct statement about Internet Gateway.

- A. Provides connectivity between internet and virtual network
- B. No bandwidth constraints
- C. Azure does not have the internet gateway concept

Select one:

- ☐ a. A
- ☐ b. A,B
- ☐ c. B,C
- ☐ d. A,B,C
- ☐ e. A,C

Select correct statement/s about Stateful and stateless rules.

- A. Only need to specify the security rule for the request, no need to specify a security rule for the response.
- B. Need to specify security rules for the request as well as the response.
- C. AWS SG, AWS NACL and Azure NSG are some implementations.

Select one:

- ☐ a. A
- ☐ b. A,B
- ☐ c. B,C
- ☐ d. A,B,C
- ☐ e. C

question

Select the correct statement/s regarding SDN and NFV.

- A. Both use network abstraction
- B. Both depend heavily on virtualization
- C. SDN defines the big picture aspect of the infrastructure, while NFV deliver a wide range of specific functionalities.

Select one:

- ☐ a. A
- ☐ b. B
- ☐ c. A,B
- ☐ d. A,B,C
- ☐ e. A,C

You have a distributed application that periodically processes large volumes of data across multiple Amazon EC2 Instances. The application is designed to recover gracefully from Amazon EC2 instance failures. You are required to accomplish this task in the most cost effective way.

Which of the following will meet your requirements?

Select one:

- ☐ a. On demand instance
- ☐ b. Reserved instance
- ☐ c. Spot instance
- ☐ d. Dedicated instance
- ☐ e. Hybrid instance

Select incorrect statement/s about Block Storage.

Select one or more:

- ☐ a. Manages data as blocks within sectors and tracks
- ☐ b. Set of blocks can be organized as a file system
- ☐ c. Suitable for transactional / structured data (file systems, databases, logs)
- ☐ d. Optimized for disk level performances
- ☐ e. Performance measured in disk I/Os

Select incorrect feature/s about Azure VM.

Select one or more:

- ☐ a. Microsoft's offering of virtual machines in cloud
- ☐ b. Provided as an PaaS
- ☐ c. Pre-configured templates (marketplace)
- ☐ d. Per minute billing
- ☐ e. Can use to store data

Question

_____ enables batch processing, which greatly speeds up high-processing applications.

Select the suitable term.

Select one:

- ☐ a. Scalability
- ☐ b. Elasticity
- ☐ c. Reliability
- ☐ d. Availability
- ☐ e. Utility

wered
of
estion

_____ is a collection of availability zones that are geographically located close to one other.

Select one:

- ☐ a. Edge Locations
- ☐ b. Regions
- ☐ c. Regional Edge Caches
- ☐ d. Rural Edge Caches
- ☐ e. Cloud

question

Select the correct statement/s about Virtual Private Cloud (VPC).

- A. Delivers the content directly from the original server
- B. Allows to customize network configurations
- C. We can only have private subnets inside a VPC.

Select one:

- ☐ a. A
- ☐ b. B
- ☐ c. A,B
- ☐ d. C
- ☐ e. B,C

Select benefits of using the cloud over traditional data centers.

Select one or more:

- ☐ a. It has less powerful servers.
- ☐ b. Data availability became more convenient with the use of the cloud.
- ☐ c. It provides various forms of services like Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS), etc
- ☐ d. Time consuming
- ☐ e. Its on-demand service allows the pay-as-you-use feature

Select the incorrect statement/s.

Select one or more:

- ☐ a. The popularization of the Internet enabled most cloud computing systems.
- ☐ b. Soft computing represents a real paradigm shift in the way in which systems are deployed
- ☐ c. Cloud computing makes the long-held dream of utility computing possible with a pay as you go, infinitely scalable, universally available system
- ☐ d. All applications benefit from deployment in the cloud
- ☐ e. All of the mentioned

Statement 1: A hybrid cloud is composed of two or more private, community or public clouds

Statement 2 : Hybrid clouds have significant variations in performance, reliability and security properties depending upon the type of cloud chosen to build the hybrid cloud.

Which of the following is correct?

Select one:

- ☐ a. Statement 1 is true and Statement 2 is false
- ☐ b. Statement 1 is false and Statement 2 is true
- ☐ c. Both statement 1 and statement 2 are true
- ☐ d. Both statement 1 and statement 2 are false.
- ☐ e. Statement 2 is true related to private cloud

_____ model consists of the types of services that you can access on a cloud computing platform.

Select one:

- ☐ a. Service
- ☐ b. Deployment
- ☐ c. Application
- ☐ d. Utility
- ☐ e. Architecture

Which of the following statements are **false** regarding IP address ranges 192.168.2.0/20 and 192.168.20.0/21 ?

Select one or more:

- ☐ a. We can add these two ranges into one virtual network in cloud
- ☐ b. We can peer two virtual networks which uses these IP ranges
- ☐ c. We cannot use these two IP ranges in a single virtual network
- ☐ d. We cannot peer two virtual networks which use these IP ranges
- ☐ e. We can configure these two IP ranges in two virtual networks which are not peered
